

Project Initialization and Planning Phase

Date	October 1, 2026
Team ID	SWTID-2026-9392
Project Name	ComicCraft - AI Comic Story Creator using Gemini Models
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example Framework Visual:

I am	I'm trying to	But	Because	Which makes me feel
Indie Comic Creator / Digital Storyteller	Publish sequential visual webtoons rapidly	Drawing panels manually takes too much time	Current AI tools lack character consistency	Frustrated & restricted in storytelling

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	An aspiring digital comic writer and storyteller.	Transform textual scripts into full multi-panel comic strips using AI tools.	Character appearances change randomly between panels.	Existing image models lack persistent visual memory and character anchor embeddings.	Frustrated and unable to produce a coherent narrative.
PS-2	An independent graphic novel creator working solo.	Generate engaging dialog bubbles and structured comic layouts efficiently.	Formatting panels and adding speech text takes hours in manual graphic software.	There is no single platform combining Gemini-driven storytelling with automated bubble positioning.	Overwhelmed by excessive manual design work.
